Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

IN CERTAIN STATES AND CITIES.

SMALLPOX.

Indiana—Evansville.

Surg. Oakley, of the Public Health Service, reported by telegraph that during the week ended April 18, 1914, 13 cases of smallpox had been notified in Evansville, Ind.

PELLAGRA.

Maine—Norway and Vicinity.

Dr. H. L. Bartlett, of Norway, Me., reports that he has seen four cases of pellagra in the vicinity of Norway in the past three years. Two of the cases recovered, one terminated fatally, and one is still under treatment. Three of the cases occurred in town and one in the country. Of the town cases the first was seen in August, 1911, the second in June, 1913, and the third has recently come to notice.

PLAGUE.

Washington—Seattle—Plague-Infected Rat Found.

Surg. Lloyd, of the Public Health Service, reported by telegraph, April 20, 1914, the finding of a plague-infected rat at Seattle, Wash.
